

Time of its Extinction, being near *Orion's* Right Shoulder, and the other near the Left Knee of *Boötes*; so that this Meteor seems pretty nearly to have accompanied the Earth in its diurnal Motion, and to have had little or no Motion besides. I have looked for this Light since, but could find nothing like it.

The Day was exceeding fine, and by my Journal I find, that,

At Noon, the Barometer was	29.98.
Thermometer	57.
Wind . . . .	East.
Decl. of the Needle	14° 10'.
At 10 at Night, Barometer	29.86.
Thermometer	57.5.
Decl. of the Needle	13° 50'.

XV. *An Account of the Case of a Calculus making its Way through an old Cicatrix in the Perinæum, by David Hartley, M. A. F. R. S.*

*Jan.* 12. 1740.  
*William Farman*, of the Parish of *Bayton* in *Suffolk*, was cut for the Stone about 15 Years ago, and a large Stone taken from him.

The said *William Farman* says, that he continued easy for about four Years after he was cut; that the Wound was quite healed up, and that he made Water in the natural Way, without any Leakage at the Wound.

In *July* last, he says, he felt great Pain at the Place where he was cut, and that it was much swelled.

It looked black, and a little Hole broke open there, out of which the Water came ; and a Stone appearing, the Hole grew wider by the Force of the Water, and his frequently touching it, till at last the Stone came away whole. It was broken afterwards by a Fall.

As soon as the Stone was come away he says that he grew easy, and the Swelling abated. The Wound is now reduced to a small Compass, and the Water still comes away through the Wound, and but very little Water comes out the natural Way.

*William Jarman* is about 30 Years of Age. He says, that the great End of the Stone came away first, which he suffered to lie at the Mouth of the Wound near a Fortnight, but he applied to no Surgeon.

*An Addition by the Publisher to the foregoing Case.*

There they articulated or rubbed against each other, while in the Bladder ; one having a round Head, the other a Cavity.

Figures of Stones which made their Way through the *Perinæum* of a Man at *Leyden*, *Anno* 1724. seen there by *C. Mortimer*.
